HELMET SHOCK ABSORPTION IMPACT ATTENUATION AND PENETRATION TEST EQUIPMENT

We supply a wide range of equipment, designed to satisfy all of the European standards and many of the American and Australian ones.

Rather than try to list them all here, we ask you please to contact us with your specific requirements and we will send you the relevant details.

We can provide you with a bespoke system, including suitable instrumentation, data acquisition hardware and software, report formatting, etc, to suit your needs.

Just let us know the standard(s) – number and title – that interest you, and we'll do the rest.

Effective: January 2008
