Calibration lenses (for telescope and target test equipment)

Description

The telescope and target equipment, as supplied by INSPEC, is calibrated before shipping. However, in order to re-calibrate the focusing of the telescope subsequently, lenses of known power may be used, as described in the standards.

The set of calibration lenses comprise one lens each, of the following nominal powers:

+0.06, +0.12, +0.25, -0.06, -0.12, -0.25 D.

Each lens is nominally 25mm in diameter before it is mounted.

The set includes a storage box.

A UKAS accredited calibration certificate is included.

Services required

None

Approximate dimensions and weight

40 x 10 x 10 cm : 1 kg

Relevant standards

ANSI/ISEA Z87.1:2020
AS/NZS 1337-1:2010
ECE Reg 22.06
EN 167:2001
ISO 16321-1:2021
ISO 18526-1:202, or other standards that use this method.
