Planimeter

Description

This instrument may be used to measure the area of a closed shape, typically drawn on a piece of paper. In particular:

- The impression of the cushion of an earmuff once the muff has been removed from the INSPEC Fit and force test equipment. Having noted the indicated headband force and having measured the area of the impression; the cushion pressure can be calculated;
- The area of the plot for a Respiratory Protective Device, established using the INSPEC Apertometer.

The equipment is supplied in a case and includes a charger.

Services required

None.

When ordering this equipment, please specify the mains voltage.

Approximate dimensions and weight

27 x 19 x 7 cm : 1.4 kg

Relevant standards

EN Standards, various for Respiratory Protective Devices and Hearing Protection

ISO 17420 series
