Filter test chamber

Description

The filter test chamber is an add-on to a NaCl flame photometer, allowing filters and filtering facepiece to be tested. It can also be used for filter gas testing.

The test chamber consists of a clear body with aluminium bulkheads. A locking clamp ensures that the door closes tightly against the door seal, preventing any leakage. The mounting ensures that the airflow through the filter is horizontal with the inlet at the opposite end of the chamber.

Services required

Bench mounted.

Approximate size & weight

50x 40 x 40 cm & 10 kg

Relevant standards

AS/NZS 1716:2012, Appendix I; 7.12; EN 143:2021, 6.12; EN 149:2009, 7.9.2; EN 403:2004, 6.11.2; EN 405:2001, 7.7.1; EN 1827:1999, +A1:2009, 7.16; EN 12083:1998, 7.5; EN 12941:2008, 6.11; EN 12942:2008, 6.11; EN 13274-7:2019, 5.3; EN 14387:2021, 5.13
